

# ANYA CHUKWUDI-EKE ANYA

## DETAILS

- ✓ **Address:** No 2 Bolanle Oluwakemi Close, Off Olokonla Junction, by Readington School, Sangotendo, Lagos, Nigeria.
- ✓ **Phone:** 08020352170 & 09014330242
- ✓ **Email:** [chuksanyaanya@gmail.com](mailto:chuksanyaanya@gmail.com)
- ✓ **Date of Birth:** 18th September, 1997

## PERSONAL STATEMENT

A resourceful and dedicated graduate of Information and Communication Engineering from Covenant University and also an enthusiast of Information Technology with experiences in its various fields especially software engineering/development. I have developed the ability to learn fast with increasing efficiency to achieve the goals of assigned projects. From my various work experiences, I have become well acquainted to managing and improving client and staff relationships, with the aim of enhancing profit and productivity.

## WORK HISTORY

### ✓ Tydacomm Limited

**April 2021 - Present**

After being deployed to the Network Planning department, I was involved with planning and optimization of sites for mobile operators, like MTN, Glo and Airtel using our (Tydacomm's) Long Range Antenna System (L-RAS) to solve coverage, capacity and coverage quality issues on urban, sub urban and rural areas. These site optimizations were carried out to ensure the proper utilization and profitability in areas with low coverage or small number of sites. I was also actively involved with in the server and license management along with the backing up of planned projects.

I was actively involved in the drive testing. A drive test is basically a collection of network signal data (signal levels) at a particular location or road. The data collected is then used for the optimization of the site/network. I employed the use of GPS (which measured the parameter of location), phones connected to a computer used measure/pick the different signal levels at a frequency band and TEMs software used in compilation and monitoring of the collected data.

### ✓ Swift Networks

**February 2019 – July 2019**

As an intern in Swift Networks working with the IT and Billing department, I was completely engaged in the company's activities which gave me a wide scope of learning. I was involved in various projects and training, from managing the billing sector of the company, indoor modem configuration, intranet development, administrative duties, server and backup management.

## EDUCATION

### ✓ B. Eng (Information and Communication Engineering)

**2020**

Covenant University

- ✓ **WASC (West African School Certificate)**  
Marist Brothers Juniorate

**2014/2015**

## **CERTIFICATION / PUBLICATIONS**

### **Software Engineering Certification at New Horizons**

**2017**

- ✓ Software Engineering: Relational Design, SQL Fundamental of Query, Object Oriented Programming, Introduction to Java, Java Programming.
- ✓ Introduction to HTML, CSS and JavaScript

### **Design and Implementation of a Low-Cost Portable Water Quality Monitoring System**

- ✓ This project utilizes sensors to gather data, in order to identify real and existing issues involving water pollution in an area and formulate plans for water quality management. [Click here](#) (Ctrl + Left-Click) to view

### **Jobberman Nigeria**

**2021**

- ✓ Jobberman Soft Skills Training

## **SKILLS**

- ✓ Excellent Communication Skill
- ✓ Emotional Intelligence
- ✓ Cognitive Flexibility
- ✓ Good Teamwork Skills
- ✓ Proficient in Microsoft Office
- ✓ Quick to adapt and understand new software
- ✓ Quick understanding of programming languages
- ✓ Excellent attention to detail

## **HOBBIES**

- ✓ Playing football
- ✓ Reading
